## List of Tables

1 Growth in Employed Residents, 1980-2000 ..... 13
2 Households by Vehicle Availability, 1960-2000 ..... 14
3 Household Vehicles Available, 1960-2000 ..... 15
4 Workers by Means of Transportation to Work, 1980-2000 ..... 16
5 Workers by Means of Transportation to Work, 1960-2000 ..... 17
6 Transit Commuting in California, 2000 ..... 18
7 Average Travel Time to Work, 1980-2000 ..... 19
8 Residential Mobility, Place-of-Residence in 1975, 1985 & 1995, 1980-2000 ..... 20
9 Disability in the Bay Area, 2000 ..... 21
10 Poverty in the Bay Area, 1990-2000 ..... 22
11 Households by Household Income, Bay Area Counties, Region and State, 2000 ..... 23
12 Median Household Income, 1990-2000 ..... 24
13 School Enrollment by Bay Area County of Residence, 1990-2000 ..... 25

A.1 Bay Area Places with the Longest and Shortest Average Commute Lengths, 2000 ..... 26
A.2 Bay Area Places Ranked by Transit Commute Share, 2000 ..... 27
A.3 Bay Area Places Ranked by Share of Commuters Walking to Work, 2000 ..... 28
A.4 Bay Area Places Ranked by Share of Workers Working at Home, 2000 ..... 29
A.5 Bay Area Places Ranked by Share of Commuters Driving Alone to Work, 2000 ..... 30
A.6 Bay Area Places Ranked by Share of Commuters Carpooling to Work, 2000 ..... 31
A.7 Bay Area Places Ranked by Share of Households with Zero Vehicles Available ..... 32
A.8 California Places Ranked by Number of Resident Transit Commuters, 2000 ..... 33

B.1 Share of Workers by Means of Transportation by Bay Area Place-of-Residence, 1990-2000, Ranked by Total Workers in 2000 ..... 34
B.2 Transit-to-Work Shares by Bay Area Place-of-Residence, 1990-2000, Ranked by Transit Share in 2000 ..... 39
B.3 Carpool-to-Work Shares by Bay Area Place-of-Residence, 1990-2000, Ranked by Carpool Share in 2000 ..... 43
B.4 Walk-to-Work Shares by Bay Area Place-of-Residence, 1990-2000, Ranked by Walk Share in 2000 ..... 47
B.5 Work-at-Home Shares by Bay Area Place-of-Residence, 1990-2000, Ranked by Work-at-Home Share in 2000 51
B.6 Drive Alone-to-Work Shares by Bay Area Place-of-Residence, 1990-2000, Ranked by Drive Alone Share in 2000 ..... 55
B.7 Bay Area Places with Largest Increases and Decreases in Transit Commuters, 1990-2000 ..... 59

B.8 Bay Area Places with Largest Increases and Decreases in Transit Commute Share, 1990-2000 ....60
B.9 Change in Average Commute Time, 1990-2000, by Bay Area Place-of-Residence.....61
B.10 Workers by Means of Transportation by Bay Area Place-of-Residence, 1990-2000.....65
B.11 Households by Vehicle Availability by Bay Area Place-of-Residence, 1990-2000.....70
B.12 Share of Households by Vehicle Availability by Bay Area Place-of-Residence, 1990-2000.....76

C.1 Disability in the Bay Area, Bay Area Places Ranked by Number of Disabled Age 5 and Over.....82
C.2 Poverty in the Bay Area, Bay Area Places Ranked by Number of Families Below Poverty Level.87
C.3 Bay Area Places Ranked by Median Household Income, 2000 .....92
C.4 Households by Household Income Level, Bay Area Places.....96
C.5 Share of Households by Household Income Level, Bay Area Places.....102
C.6 Owner-Occupied Housing by Value, & Median Value, Bay Area Places, Ranked by Median.....108

## I. INTRODUCTION

This data summary provides selected tabular summaries of data from the U.S. decennial census. The dataset used in this analysis is the Census 2000 Demographic Profiles #2, 3, 4 (DP-234) produced by the U.S. Census Bureau.

Demographic Profiles #2, 3 and 4 were released on a state-by-state flow basis in spring 2002, with California's version of DP-234 released May 14, 2002.

Demographic Profiles #2, 3 and 4 contain three pages of Census 2000 data. Profile page #2 is the "Profile of Selected Social Characteristics" and includes information on school enrollment status, educational attainment, marital status, veteran status, disability status, nativity and place of birth, language spoken at home, and ancestry. Profile page #3 is the "Profile of Selected Economic Characteristics" and includes information on employment status, commuting to work, occupation, industry, class of worker, household income, and poverty status. Profile page #4 is the "Profile of Selected Housing Characteristics" and includes information on the age, size, and value of the housing unit, year householder moved into the unit, and household vehicle availability.

Demographic Profiles #2, 3 and 4 provide a first look at sample data based on the Census 2000 "long form." The census long form was answered by about 1-in-6 U.S. households, or about 16.7 percent of total households in the United States. The sampling rate ranged from 1-in-2 rural households to about 1-in-8 urban households.

The geographic focus for this report is the nine-county San Francisco Bay Area, including the counties of Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano and Sonoma. Data is reported at the region, county and place-level.

This data summary includes 13 tables in the body of the report and several sets of appendix tables.

Appendix A provides selected rankings of Bay Area and California places by selected variables from these demographic profiles.

Appendix B includes 1990 to 2000 comparisons for Bay Area places by selected variables.

Appendix C includes Census 2000 data for Bay Area places for other variables.

This report also includes a full set of the four page demographic profiles for the United States, California, the Bay Area, all nine Bay Area Counties, and two of the largest cities in the Bay Area: San Jose and Oakland.

This report, MTC Data Summary #4, is the fourth in a series of Census 2000 reports produced by MTC staff for general use.

Data Summary #1, completed October 2001, is based on the Public Law 94-171 (PL 94-171) data product released by the Census Bureau in March 2001. Data Summary #2, completed November 2001, is based on the Demographic Profile #1 data product released by the Census Bureau in May 2001. Data Summary #3, published October 2002, is based on the Summary File #1 data

released by the Census Bureau in August 2001. These three MTC Data Summaries are all based on the 100 percent, or "short form" data from Census 2000.

For more information on previous MTC census data summaries, visit the MTC web page: http://www.mtc.ca.gov/datamart/census/datasum.htm

## II. DISCUSSION OF RESULTS

### A. Workers and Vehicles

Growth in the number of employed residents, 1980 to 2000, by Bay Area county of residence, is shown in Table 1. This table also shows the change in total households, employed residents divided by households, total population, and employed share of total population. Employed residents are defined as employed civilians plus armed forces workers. Employed residents included workers residing in group quarters, such that the "employed residents divided by households" is not a true indicator of "workers per household." (Data on workers in households will be available from the Census Transportation Planning Package, or CTPP).

One of the most significant findings from Census 2000 is the decline in the ratio of workers to households, decreasing from 1.40 workers/household in 1990 to 1.37 workers/household in 2000. Only Napa County (1.27 to 1.29 workers/household), San Francisco (1.28 to 1.30 workers/household) and Sonoma (1.30 to 1.33 workers/household) show an increase in this indicator. All other Bay Area counties show a decline in workers per household, with the most significant decrease in Santa Clara County (1.56 workers/household in 1990 decreasing to 1.49 workers/household in 2000.)

This decreasing trend in Bay Area workers per household reverses an earlier trend that shows a significant increase in this rate between 1980 and 1990, from 1.30 to 1.40.

Overall, the Bay Area's total population increased by 12.6 percent between 1990 and 2000, total households increased by 9.8 percent, and employed residents increased by 7.2 percent between 1990 and 2000.

Nationally, the number of employed residents / household declined from 1.28 in 1990 to 1.24 in 2000:

| Year | Households | Employed Residents | Workers/HH |
|---|---|---|---|
| 1990 | 91,947,410 | 117,390,130 | 1.277 |
| 2000 | 105,480,101 | 130,873,649 | 1.241 |

Of the 36 largest metropolitan planning organizations in the US (population > 1 million), 30 show decreasing workers/household, 1990-2000, and only 6 show INCREASING workers/household. Those with an increase: Salt Lake City (1.40 to 1.51), Denver (1.33 to 1.36), Portland (1.29 to 1.31), Phoenix (1.26 to 1.27), Pittsburgh (1.10 to 1.11), and Tampa-St. Pete (1.07 to 1.08). Washington, DC (1.53 to 1.40) and Miami (1.31 to 1.19) show the largest decrease in workers per household.

Households by vehicle availability, 1960 to 2000, by Bay Area county of residence, is presented in Table 2. At the regional level, the share of Bay Area households with zero vehicles has been on a constant decline since vehicle availability was first collected in the 1960 Census. Over the past ten years, the share of households with zero vehicles decreased from 10.5 to 10.0 percent, while the number of households with zero vehicles increased for the first ever time, from 237 thousand to 248 thousand households.

All Bay Area counties, except Alameda, show an increase in the number of zero vehicle households between 1990 and 2000. The number of Alameda County households with zero vehicles decreased from 58.7 thousand in 1990 to 57.3 thousand in 2000.

Three Bay Area counties show an increase in the share of zero vehicle households between 1990 and 2000: Contra Costa (6.4 to 6.5 percent), Santa Clara (5.3 to 5.7 percent) and Solano (5.7 to 6.6 percent zero vehicle households.) Alameda, Napa, San Francisco and Sonoma Counties show slight decreases in the shares of household without vehicles, while the zero vehicle shares are unchanged in Marin (5.1 percent) and San Mateo (6.1 percent) counties.

San Francisco has the highest share of zero vehicle households, decreasing from 30.7 percent in 1990 to 28.6 percent in 2000. Alameda County has the second highest share of zero vehicle households, decreasing from 12.2 percent in 1990 to 10.9 percent in 2000.

One-third of Bay Area households have one vehicle. The one vehicle household share ranges from a low of 29.0 percent of Santa Clara County households to a high of 42.0 percent of San Francisco households.

The largest household group by vehicle availability level is the two-vehicle group, at 37.2 percent of Bay Area households (918 thousand out of 2,466 thousand.) The two-vehicle share ranges from a low of 22.1 percent of San Francisco households to a high of 42.3 percent of Marin County households.

The share of Bay Area households with three-or-more vehicles declined between 1990 and 2000 from 20.5 percent to 19.8 percent. The county-level shares of three-or-more vehicle households ranges from just 7.3 percent of San Francisco households to 24.4 percent of Santa Clara and Solano County households. The three-or-more household shares have shown the greatest change over the past forty years, increasing from 3.3 percent of Bay Area households in 1960 to 19.8 percent in the current day.

Detailed Bay Area place-level data on households by vehicle availability level are provided in Appendix Table B.11. Data on the share of households by vehicle availability level are in Appendix Table B.12. These tables include data from both the 1990 and 2000 Censuses.

Household vehicles available, and average vehicles per household, are shown in Table 3. Data is provided for the 1960 through 2000 censuses. Also shown are total population and vehicles per capita.

The overall regional average number of vehicles per household has stabilized at 1.76 between 1990 and 2000. Regional vehicles per capita declined from 0.66 vehicles per person in 1990 to 0.64 vehicles per person in 2000.

County-level averages in the year 2000 range from a low of 1.11 vehicles per household in San Francisco to a high of 1.97 vehicles per household in Santa Clara County. Alameda County has the second lowest average at 1.69 vehicles per household in 2000. Vehicles per household increased in two counties between 1990 and 2000: Alameda (increasing from 1.68 to 1.69) and San Francisco (1.06 to 1.11). Vehicles per household decreased in five Bay Area counties between 1990 and 2000: Contra Costa (1.91 to 1.88), Marin (1.85 to 1.79), Napa (1.90 to 1.87), Santa Clara (1.99 to 1.97) and Solano (1.94 to 1.93).

Vehicles per capita decreased in eight of the nine Bay Area counties between 1990 and 2000. It only increased in San Francisco over this time period, from 0.45 to 0.47 vehicles/person.

One of the principal reasons for the lack of regional change in vehicles per household and vehicles per capita is the slower than expected growth in the number of regional workers. Data from the Census Transportation Planning Package (CTPP) will provide better information on the distribution of households by the number of workers in the household, stratified by the number of vehicles available in the household. This household cross-classification and other tables from the CTPP will provide analysts a better understanding of the types of household growth that have contributed to this modest change in household vehicle availability in the Bay Area.

## B. Commuting

Data on the number of commuters by means of transportation to work is provided in Tables 4 through 6. Table 4 includes data from the 1980 through 2000 Censuses. Table 5 includes comparisons for the 1960 through 2000 Censuses. Table 6 includes Census 2000 transit commuting data by California metropolitan areas.

Means of transportation to work was first collected in the 1960 Census. All of the decennial censuses since 1960 have collected data on transit commuting, walking to work, and working at home. Most of the changes between 1960 and 2000 have been in further breakdowns of in-vehicle commuting, transit commuting, and other means (bicycle and motorcycle commutes.)

Data on driving alone and carpooling to work was first collected in the 1980 Census (see Table 4). At a regional level, the share of workers driving alone to work has been fairly stable over the past ten years, decreasing from 68.2 percent of commuters in 1990 to 68.0 percent of commuters driving alone to work in 2000. Likewise, the carpool share of commuters has been very stable, declining from 13.0 percent in 1990 to 12.9 percent in 2000.

Bay Area transit commute share increased between 1990 and 2000, from 9.5 percent to 9.7 percent. The most significant decrease in commute share is for the walk-only mode, decreasing from 3.6 percent of Bay Area commuters in 1990 to 3.2 percent in 2000. Other means of transportation (bicycle, motorcycle and other) declined from 2.3 percent in 1990 to 2.2 percent in 2000.

The most significant increase in commute share is for Bay Area workers working at home. This share increased from 3.4 percent of all workers in 1990 to 4.0 percent in 2000.

In terms of long-term trends, 1960 to 2000, the most consistent trend is the decrease in the share of Bay Area resident workers walking to work, steadily decreasing from 7.8 percent of workers in 1960 to 3.2 percent of workers in 2000. Another interesting long term trend is the decrease in

workers working at home between 1960 to 1980 (4.7 percent in 1960 decreasing to 1.9 percent by 1980), then a consistent increase in the share of workers working at home between 1980 and 2000 (increasing to 4.0 percent in Census 2000).

Long-term transit commute share trends show a general downward trend between 1960 and 2000. Transit commute shares decreased sharply between 1960 and 1970, and between 1980 and 1990. Transit commute shares increased slightly between 1970-1980 and 1990-2000.

Vehicle commute shares have shown a general upward trend between 1960 and 2000, though the 1990 to 2000 period is the only time where the vehicle commute share declined on a regional basis.

Carpool commute shares peaked at 16.3 percent of regional commuters in 1980 and have stabilized at about 13 percent of commuters in 2000.

The total number of Bay Area commuters increased by 7.1 percent between 1990 and 2000, from 3,085,600 commuters to 3,306,100 commuters. In terms of absolute numbers of commuters, the number of drive alone commuters increased by 143 thousand commuters, from 2,104,700 drive alone commuters in 1990 to 2,248,100 drive alone commuters in 2000. In terms of percent increase, workers working at home increased by 25.1 percent between 1990 and 2000, from 106 thousand to 133 thousand at home workers.

The number of Bay Area transit commuters increased by 9.4 percent between 1990 and 2000, from 293,600 to 321,100 average daily transit commuters. The number of Bay Area carpool commuters increased by 6.7 percent between 1990 and 2000, from 399,700 to 426,500 carpoolers.

At a county level, San Francisco County dominates in terms of transit commute share, with 31.1 percent of San Francisco resident workers commuting by public transit. Still, this represents a fairly steady decline in the San Francisco transit commute share, decreasing from a high of 39.6 percent in 1960 to 31.1 percent in 2000. Even though the San Francisco transit commute share decreased from 33.5 percent in 1990 to 31.1 percent in 2000, the number of San Francisco resident transit commuters increased from 128,200 in 1990 to 130,300 in 2000, a 1.7 percent increase in transit commuting.

Transit commute shares are now higher in Alameda County (increasing from 10.0 percent in 1990 to 10.6 percent in 2000) than in Marin County (decreasing from 10.3 percent in 1990 to 10.1 percent in 2000). Contra Costa County has the fourth highest transit commute share in the Bay Area, and has shown the largest increase in transit commute share in the 1990s, increasing from a 7.8 percent transit share in 1990 to 9.0 percent transit share in 2000. Santa Clara County also has shown a significant increase in transit share, increasing from 3.0 percent in 1990 to 3.5 percent by 2000.

All Bay Area counties except Marin are showing an absolute increase in the number of transit commuters between 1990 and 2000. The number of Marin County resident transit commuters decreased from 12,900 in 1990 to 12,800 in 2000, a small and perhaps statistically insignificant decline.

Walk-to-work commute shares range from a low of 1.5 percent in Contra Costa County to 9.4 percent in San Francisco County. All Bay Area counties, except Marin, show a slight drop in the

walk-to-work commute share between 1990 and 2000. Marin is stable at a 3.0 percent walk-to-work share.

Working at home shares range from a low of 3.1 percent in Solano County to 8.8 percent in Marin County. Only Alameda County (3.9 percent in 1990 to 3.5 percent in 2000) shows a decrease in working at home shares.

The most significant change in working at home is in Marin County, where the work-at-home share increased from 6.5 percent of workers in 1990 to 8.8 percent of workers by 2000. The total number of Marin County workers increased by just 1.3 percent between 1990 and 2000. Marin is notable for slight increases in the number of drive alone, walk and other means of transportation commuting; a slight decrease in the number of resident transit commuters; a significant decrease in the number of carpool commuters; and a significant increase in the number of workers working at home.

Carpool to work shares range from a low of 10.7 percent in Marin County to a high of 17.7 percent in Solano County. Carpool shares increased in Alameda County (12.8 percent in 1990 increasing to 13.8 percent in 2000) and in Napa County (12.8 percent in 1990 increasing to 14.8 percent in 2000). Carpool shares decreased in all other Bay Area counties, with the most significant decrease in Solano County (18.5 percent in 1990 decreasing to 17.7 percent in 2000). Alameda County shows the most significant increase in the number of carpoolers, increasing from 80,800 carpoolers in 1990 to 93,700 carpoolers in 2000.

Drive alone to work shares range from a low of 40.5 percent in San Francisco to a high of 77.3 percent in Santa Clara County. Santa Clara County has led the Bay Area in terms of drive alone commute share ever since the drive alone versus carpool commute data was first collected in 1980. Between 1990 and 2000, drive alone commute shares decreased in six of the nine Bay Area counties; drive alone commute shares increased in three counties: San Francisco (38.5 percent in 1990 and 40.5 percent in 2000), Solano (72.0 percent in 1990 increasing to 73.3 percent in 2000) and Sonoma (increasing from 74.6 to 74.7 percent). All Bay Area counties are showing an increase in the number of drive alone commuters, 1990 to 2000, led by Alameda County (+27,700 drive alone commuters), Sonoma (+26,100 drive alone commuters), Contra Costa (+23,500 drive alone commuters) and San Francisco (+22,300 drive alone commuters).

Detailed information on bicycle, motorcycle and the different public transportation means of transportation to work will be available in the Summary File #3 data file, and the Census Transportation Planning Package (CTPP).

Detailed data on means of transportation to work by place (city) of residence are included in Appendices A and B.

Year 2000 transit commuting in California, by metropolitan area, is summarized in Table 6. Census 2000 data for California shows 736 thousand daily transit commuters in a state with 14.5 million total commuters.

Forty-four percent of California's transit commuters reside in the Bay Area (321 out of 736 thousand). Twenty-three percent of the state's total commuters reside in the Bay Area (3.3 million out of 14.5 million).

The transit commute share for California is 5.1 percent in 2000. The Bay Area has the highest transit commute share in California at 9.7 percent, followed by the Los Angeles region (4.7 percent) and San Diego (3.4 percent transit share).

The last table in this set, Table 7, shows the average reported travel time to work, 1980 to 200, by county and region of residence. The Bay Area average one-way reported commute duration increased by 14.8 percent between 1990 and 2000, from 25.6 minutes in 1990 to 29.4 minutes in 2000. This 3.8-minute increase in the average reported commute, 1990 to 2000, compares to a 1.3-minute increase in the average reported commute, 1980 to 1990.

This large jump in the average commute duration may be due to the tendency of census respondents to round off their reported commute duration to the nearest five or ten minutes. Detailed census data, not available for this report, may show a significant shift in respondents reporting 15 or 20 minutes in 1990, to 25, 30 and 35 minute commutes in Census 2000.

The average commute duration ranges from a low of 24.3 minutes for Napa County resident commuters to a high of 34.4 percent for Contra Costa resident commuters. Contra Costa shows the highest absolute gain in average commute time (+5.1 minutes) and Alameda County shows the highest percent gain in average commute time (+19.4 percent), 1990 to 2000.

Place-level data on average commute duration is included in Appendix Table A.1 and Table B.9.

## C. Residential Mobility

Bay Area region and county data on residential mobility is included in Table 8. Data is shown for the 1980 through 2000 censuses, and reports information on where persons resided five years previous to the census year (i.e., where the person resided in 1975, 1985 and 1995). Data is broken down into: a) resided in same house; b) resided in a different house but the same county; c) resided in a different house but in a different California county; d) resided somewhere in the United States but outside California; and e) lived abroad.

Data is not available on "lived in Bay Area in 1995" from Census 2000.

The proportion of Bay Area residents living in the same house as five years ago increased between the 1990 and 2000 Censuses, from 47.2 percent in 1990 to 52.4 percent in 2000. The proportion of Bay Area residents living abroad five years previous to the census year also increased, from 5.1 percent in 1990 to 5.8 percent in 2000. Proportions of Bay Area residents living elsewhere in their county, elsewhere in California, or elsewhere in the United States, declined between 1990 and 2000.

The county-level data on lived in the same house in 1995 ranges from a low of 49.9 percent of Solano County residents to a high of 56.6 percent of San Mateo County residents. This "same house" proportion increased for all Bay Area counties between 1990 and 2000, the most significant being Solano County (40.0 percent same house in 1985, increasing to 49.9 percent same house in 1995).

The "lived abroad" share in 1995 ranges from a low of 3.0 percent in Sonoma County to a high of 8.0 percent of Santa Clara County residents. San Francisco has traditionally had the highest

share of population living abroad five years previous to the census year, at 8.1 percent in the 1975-1980 period and 8.6 percent of the population in the 1985-1990 period.

The "outside California" share in 1995 ranges from a low of 4.0 percent of Sonoma County persons to 9.3 percent of San Francisco residents. Solano County has traditionally had the highest share of population living outside California five years previous to the census year, at 12.7 percent in the 1975-1980 period and 10.2 percent of the population in the 1985-1990 period.

## D. Disability

Disability data from the decennial census has significantly changed ever since this data was collected in the 1840 Decennial Census. The following paragraph discusses disability data collected between 1840 and 1990:

"Data on disability [were first] collected in the 1840 census. From 1840 through 1910, there were various census inquiries on mental or physical disabilities. There were no items on disability in recent censuses until 1970, when a question was included on the sample questionnaire that asked whether a person had a condition affecting his or her ability to work, and how long this limitation had existed. In 1980, the disability series added an item asking about an individual's capacity to use public transportation. For the 1990 census, the transportation segment was dropped, but a second disability question was added to the questionnaire. This was a two-part inquiry on activity limitations that asked whether the person had difficulty going outside the home or taking care of his or her own personal needs in the home. The 1990 census, therefore, collected data on both work disability and activity limitations."

[source: Census of Population and Housing, 1990: Content Determination Reports: Disability, prepared by the Bureau of the Census. Washington: The Bureau, 1990. Report CDR-10. p. 3.]

The disability questions were significantly changed between the 1990 and 2000 Decennial Censuses. The four-part question from the 1990 Census (self-care disability; outside home alone difficulty; work limitation; and work prevention) was replaced by a six-part question in the Census 2000:

1. Sensory disability;
2. Physical disability;
3. Mental disability;
4. Self-care disability;
5. Outside home alone difficulty; and
6. Work disability.

Do to these major revisions in the disability questions, historical comparisons of Census 2000 data to previous decennial census data is not advisable. However, the Census 2000 disability data is fairly consistent with other Census Bureau surveys including the Current Population Survey (CPS). The CPS includes other detailed information on disabilities and severity of disabilities.

In Census 2000, disability status is tabulated for only the civilian, non-institutional population, age five and over. This excludes about 490 thousand Bay Area residents. Census 2000 data shows that over 1.1 million Bay Area residents self-reported one or more disabilities. This represents 17.6 percent of the region's population. This compares to 19.3 percent of the United States population and 19.2 percent of California population self-reporting one or more disabilities.

The share of persons with disabilities by age is 6.9 percent for persons age 5 to 20; 17.3 percent for persons age 21 to 64; and 40.2 percent for persons age 65 years and over. This compares to the United States with 8.1 percent share disabled for persons age 5 to 20; 19.2 percent for persons age 21 to 64; and 41.9 percent for persons age 65 years and over.

Bay Area county-level disability shares range from a low of 16.4 percent with disabilities in both San Mateo and Santa Clara Counties, to a high of 20.3 percent with disabilities in San Francisco County.

Bay Area county-level youth (age 5 to 20) disability shares range from a low of 6.4 percent in both Marin and San Mateo Counties, to a high of 8.1 percent with disabilities in San Francisco. Middle age (age 21 to 64) disability shares range from a low of 14.6 percent in Marin County to 20.3 percent in Solano County. Senior (age 65 years and over) disability shares range from a low of 31.3 percent in Marin County to 44.1 percent in San Francisco County.

Disability data by Bay Area place of residence, ranked by number of persons self-reporting a disability, is included in Appendix Table C.1.

## E. Poverty and Income

The number of Bay Area families and individuals with incomes below the U.S. poverty level is shown in Table 10. This includes data for both 1990 and 2000.

The Bay Area share of persons with incomes below the poverty level increased from 8.5 percent in 1990 to 8.6 percent in 2000. California's share of persons below the poverty level also increased, from 12.5 percent in 1990 to 14.2 percent in 2000. The overall number of Bay Area residents with incomes below the poverty level increased by 14.1 percent, from 502 thousand individuals in 1990 to 573 thousand individuals by 2000.

The Bay Area share of families with incomes below the poverty level decreased from 6.1 percent of families in 1990 to 5.7 percent of families in 2000. This contrasts to California where the share of families living below the poverty level increased from 9.3 percent in 1990 to 10.6 percent of families in 2000.

The county-level shares of individuals below the poverty level ranges from a low of 6.6 percent in Marin County to 11.3 percent in San Francisco. Most Bay Area counties show a slight increase in the individual poverty share, but San Francisco and San Mateo show slight decreases in these shares. Notably, the share of San Franciscans living below the poverty level decreased from 12.7 percent in 1990 to 11.3 percent in 2000. San Francisco is the only county in the Bay Area with an absolute decrease in the number of persons with incomes below the poverty level.

The county-level shares of families below the poverty level ranges from a low of 3.5 percent of San Mateo County families to a high of 7.8 percent of San Francisco families. The share of families under the poverty level increased in three Bay Area counties between 1990 and 2000: Marin (3.0 percent to 3.7 percent), Napa (4.6 to 5.6 percent) and Solano (6.0 to 6.1 percent). In terms of absolute numbers of families, all counties show a modest increase in the number of families below the poverty level, and only San Francisco and San Mateo show a decline in the number of poverty families.

Detailed place-level data on individuals and families with incomes below the poverty level are included in Appendix Table C.2.

The number of Bay Area households by household income level, and median household income, Census 2000, is shown in Table 11.

The median household income for the nine-county San Francisco Bay Area is approximately $62,300. This is 31 percent higher than the California median income of $47,493.

Median household income ranges from a low of $41,738 in Napa County to a high of $74,335 in Santa Clara County. Marin County has the second highest median income in the region at $71,306, followed by San Mateo County at $70,819.

Change in median household income, 1990 to 2000, by Bay Area county of residence, is shown in Table 12. The median household income data for the 1990 Census is inflated to 1999 constant dollars using the ratio of the consumer price indices for the San Francisco Bay Area, 1999 to 1989 (530.2 / 388.5 = 1.365 inflator).

Between 1990 and 2000 the Bay Area's median household income increased by 9.7 percent, from $56,800 to $62,300 (1999 constant dollars).

Solano County has the slowest growth in median household income, increasing by 1.3 percent between 1990 and 2000, from $53,400 to $54,100.

San Francisco has the fastest growth in median household income, increasing by 21.1 percent between 1990 and 2000, from $45,600 to $55,200. Santa Clara County has the second fastest growth in median household income, increasing from $65,700 to $74,300, a 13.2 percent increase.

Detailed place-level data on median household income and households by household income levels is included in Appendix Tables C.3 through C.5.

## F. School Enrollment Status

School enrollment status for the San Francisco Bay Area and counties, 1990 to 2000, is provided in Table 13. This includes data by pre-primary, elementary to high school, and college enrollments. Census 2000 data is based on self-reported responses to the "long form" questions #8a ("At any time since February 1, 2000, has this person attended regular school or college") and #8b ("What grade or level was this person attending?")

The Bay Area student population increased by 15.4 percent between 1990 and 2000, from 1,615,500 to 1,863,900 persons. Pre-primary school enrollment increased by 3.4 percent, and elementary through high school enrollments increased by 31.8 percent between 1990 and 2000.

Between 1990 and 2000 the Bay Area college population decreased by 7.7 percent, from 591 thousand to 546 thousand.

Between 1990 and 2000 the Bay Area school enrollment ranged from a 2.2 percent increase in San Francisco County to a high of 26.4 percent growth in Contra Costa County.

Pre-primary school enrollment range from a low of –17.2 percent decline in Napa County to a 9.2 percent increase in Alameda County. Solano and Sonoma Counties also show declines in pre-primary school enrollments between 1990 and 2000.

Between 1990 and 2000, elementary through high school enrollment changes range from a low of a 5.4 percent increase in San Francisco to a 43.7 percent increase in Contra Costa County. Elementary through high school enrollment increased by 40.3 percent in Sonoma County over this same time period.

Between 1990 and 2000 college enrollments declined in all Bay Area counties. The sharpest decrease was a 24.0 percent decline from Marin County. The mildest decrease was a 0.2 percent decline in Sonoma County.

Data on school enrollment is only available by the area of residence, not by the location of the school. Detailed school enrollment data by census tract and block group is available in the Summary File #3.

## III. DATA AVAILABILITY AND CONTACT INFORMATION

This data summary was written in Microsoft WORD, version 2000. The data tables are in Microsoft EXCEL workbooks, also version 2000. These WORD and EXCEL files are available for downloading from MTC's Internet site. Point your Web browser to:

ftp://ftp.abag.ca.gov/pub/mtc/census2000/datasummary/

The general Census 2000 Internet site maintained by MTC and the Association of Bay Area Governments (ABAG) is available at:

http://www.bayareacensus.ca.gov/

These sites will be updated to include various maps, databases, profile summary reports and other items of interest to the census data user.

The data user also may want to investigate the Census Bureau's American FactFinder to find other detailed Census 2000 results. Users should point their Web browsers to the following Web site:

http://factfinder.census.gov/

For more information on this data summary or other Census 2000 issues or to request an older version of this WORD document or EXCEL workbooks, please contact the report author, Chuck Purvis, at 510-464-7731, or e-mail: cpurvis@mtc.ca.gov.

Table 1
Growth in Employed Residents, 1980 - 2000
1980 - 2000 Decennial Censuses

| County of Residence | Employed Residents | | | Total Households | | | Employed per Household | | |
|---|---|---|---|---|---|---|---|---|---|
| | 1980 | 1990 | 2000 | 1980 | 1990 | 2000 | 1980 | 1990 | 2000 |
| Alameda | 522,118 | 648,461 | 694,194 | 426,092 | 479,518 | 523,366 | 1.225 | 1.352 | 1.326 |
| Contra Costa | 307,627 | 409,351 | 451,989 | 241,534 | 300,288 | 344,129 | 1.274 | 1.363 | 1.313 |
| Marin | 118,569 | 127,579 | 129,102 | 88,723 | 95,006 | 100,650 | 1.336 | 1.343 | 1.283 |
| Napa | 43,197 | 52,683 | 58,589 | 36,624 | 41,312 | 45,402 | 1.179 | 1.275 | 1.290 |
| San Francisco | 348,292 | 391,292 | 428,060 | 298,956 | 305,584 | 329,700 | 1.165 | 1.280 | 1.298 |
| San Mateo | 314,275 | 353,626 | 361,720 | 225,201 | 241,914 | 254,103 | 1.396 | 1.462 | 1.424 |
| Santa Clara | 666,642 | 812,345 | 844,738 | 458,519 | 520,180 | 565,863 | 1.454 | 1.562 | 1.493 |
| Solano | 102,725 | 162,219 | 179,003 | 80,426 | 113,429 | 130,403 | 1.277 | 1.430 | 1.373 |
| Sonoma | 131,141 | 194,387 | 229,980 | 114,474 | 149,011 | 172,403 | 1.146 | 1.305 | 1.334 |
| Region | 2,554,586 | 3,151,943 | 3,377,375 | 1,970,549 | 2,246,242 | 2,466,019 | 1.296 | 1.403 | 1.370 |

| County of Residence | Total Population | | | Employed Share of Pop. | | |
|---|---|---|---|---|---|---|
| | 1980 | 1990 | 2000 | 1980 | 1990 | 2000 |
| Alameda | 1,105,379 | 1,279,182 | 1,443,741 | 47.2% | 50.7% | 48.1% |
| Contra Costa | 656,380 | 803,732 | 948,816 | 46.9% | 50.9% | 47.6% |
| Marin | 222,568 | 230,096 | 247,289 | 53.3% | 55.4% | 52.2% |
| Napa | 99,199 | 110,765 | 124,279 | 43.5% | 47.6% | 47.1% |
| San Francisco | 678,974 | 723,959 | 776,733 | 51.3% | 54.0% | 55.1% |
| San Mateo | 587,329 | 649,623 | 707,161 | 53.5% | 54.4% | 51.2% |
| Santa Clara | 1,295,071 | 1,497,577 | 1,682,585 | 51.5% | 54.2% | 50.2% |
| Solano | 235,203 | 340,421 | 394,542 | 43.7% | 47.7% | 45.4% |
| Sonoma | 299,681 | 388,222 | 458,614 | 43.8% | 50.1% | 50.1% |
| Region | 5,179,784 | 6,023,577 | 6,783,760 | 49.3% | 52.3% | 49.8% |

*Employed residents are defined as civilian, employed plus armed forces workers. Includes workers residing in group quarters.*

Table 2
Households by Vehicle Availability, 1960 - 2000
1960 - 2000 Decennial Censuses

| County | Year | No Vehicle | % of Total | One Vehicle | % of Total | Two Vehicles | % of Total | Three-Plus Vehicles | % of Total | Total Households |
|---|---|---|---|---|---|---|---|---|---|---|
| | 1960 | 54,827 | 18.6% | 162,752 | 55.1% | 68,373 | 23.1% | 9,415 | 3.2% | 295,367 |

Table 6
Transit Commuting in California
Census 2000

| Region/State | Total Commuters | Transit Commuters | Transit Share |
|---|---|---|---|
| Los Angeles | 6,767,600 | 315,500 | 4.7% |
| San Francisco Bay Area | 3,306,100 | 321,100 | 9.7% |
| San Diego | 1,299,500 | 43,800 | 3.4% |
| Sacramento | 852,400 | 22,100 | 2.6% |
| Monterey Bay | 313,700 | 8,000 | 2.6% |
| Fresno | 294,900 | 5,100 | 1.7% |
| Bakersfield | 229,700 | 3,100 | 1.3% |
| Stockton | 213,600 | 3,100 | 1.5% |
| Santa Barbara | 179,400 | 4,400 | 2.5% |
| Modesto | 170,200 | 1,600 | 0.9% |
| San Luis Obispo | 107,800 | 1,100 | 1.0% |
| Other California | 790,300 | 7,100 | 0.9% |
| California, TOTAL | 14,525,300 | 736,000 | 5.1% |

Los Angeles region includes the counties: Los Angeles, Orange, Riverside, Ventura and San Bernardino.

San Diego region includes San Diego County.

Sacramento region includes the counties: Sacramento, Yolo, Yuba, Sutter, Placer and El Dorado.

Monterey Bay region includes the counties: Monterey, Santa Cruz and San Benito.

Fresno region includes Fresno County.

Bakersfield region includes Kern County.

Stockton region includes San Joaquin County.

Santa Barbara region includes Santa Barbara County.

Modesto region includes Stanislaus County.

San Luis Obispo region includes San Luis Obispo County.

Table 7
Average Travel Time to Work - 1980 - 2000
1980 - 2000 Decennial Censuses

| County of Residence | Commute Duration (One-Way, minutes) 1980 | 1990 | 2000 | Percent Change 1990-2000 | Percent Change 1980-2000 |
|---|---|---|---|---|---|
